Booth 87,
Hall 11

Sysmex Educational Workshop #11

A detailed symposium on possibilities in automating
laboratory workflows

Tuesday 20 May 2025

14:30 – 15:30

Auditorium 500

Chair/ moderator:

Maros Heidinger

Speakers:

Dr Erhan Palaoğlu,

Anja de Jong,

Johanna Engelage

A detailed symposium on possibilities in automating laboratory workflows

The way we work is at the centre of the healthcare journey. Every step taken in the laboratory - from processing samples to deciding upon a clinical intervention - is a small part of the patient's overall journey for treatment.

Join us and a panel of interdisciplinary experts as we discuss the newest possibilities for tailored automation in labs as well as the value it brings clinicians and patients, ultimately allowing for better and more sensitive care.

Topics presented will include:

- Automated laboratory workflows
- Real-life applications
- Innovations in patient care
- Ideas for further laboratory optimisation

Discover how Sysmex is contributing to laboratory workflows as dynamic, integrated systems that drive better healthcare outcomes.
