Sysmex Educational Workshop #1

**Exploring innovations in diagnosing and managing
haemostasis disorders**

Monday 19 May 2025

14:30 – 15:30

Auditorium 500

Chair/ moderator:

Dr Andreas R. Rechner

Speakers:

Priv. Doz. Dr Florian Prüller,

Danielle White,

Thomas Pitchford, PhD

Exploring innovations in diagnosing and managing haemostasis disorders

Precision in haemostasis testing is essential for delivering the best possible care. From inherited platelet function disorders to optimising anti-Xa assays, laboratories play a key role in advancing diagnosis and treatment.

Join us for an insightful symposium where leading experts will explore the latest approaches in haemostasis diagnostics and their clinical applications, chaired by **Dr Andreas R. Rechner**, Scientific Marketing Manager, Haemostasis, Sysmex Europe SE.

Topics presented will include:

- The relevance of inherited platelet function disorders in clinical practice
- How to screen for and diagnose inherited platelet function disorders
- Differences and commonalities in commercially available anti-Xa assays

Discover how Sysmex is advancing haemostasis diagnostics to support better patient outcomes.
